## Why choose **PW Skills** ?

Don't let your academics be the end of the road. Take charge of your career journey with our Pre Placement Training program, where we empower you with the necessary skills and knowledge to pave your path to success.

# ACHIEVE MORE WITH LESS

Our goal is to make education and experiential skills affordable and accessible to everyone regardless of their disparate economic and educational backgrounds. We empower students to make demands unlike any other platform or institute because curiosity cannot be contained. Learning cannot be boxed in a book. So let's step ahead and 'build together'.

PW Skills

How will this program help  
me land my **dream job** ?

# Your Path to Professional Excellence!

## Expert Mentoring

Gain invaluable guidance from industry experts who will serve as your mentors throughout the program. Their deep knowledge and experience will provide you with the professional insights and advice needed to excel in your chosen field.

## Skill Development

Sharpen your professional skills and elevate your capabilities through our comprehensive training modules. From technical proficiencies to essential soft skills, our program ensures you acquire the competencies required to thrive in today's competitive job market.

## Real-World Assignments

Apply your knowledge to real-world scenarios through industry-relevant assignments. These practical exercises will allow you to develop a deeper understanding of the challenges professionals face and equip you with the problem-solving skills necessary for success.

## Interview Preparation

It's time to fine-tune your interview skills and hit all the right notes. Our mentors will give you the inside scoop on nailing interviews with their secret tips and tricks. With mock interviews and resume-building sessions, you'll be ready to shine when the spotlight's on you.

## Career Advancement

As you complete the program, you'll be well-prepared to pursue your dream job. Armed with enhanced skills, industry knowledge, and a refined professional profile, you'll be positioned to secure employment in your desired field and embark on a successful career journey.

What Exactly will I learn  
that will help me ace  
my **Interviews** ?

# YOUR GATEWAY TO CAREER SUCCESS!

Our comprehensive curriculum is carefully structured to bridge the gap between academic learning and industry requirements. With a blend of theoretical knowledge and practical application, this meticulously crafted program is designed to empower you with the skills, knowledge, and confidence needed to excel in the professional world.

Career

# Course Curriculum

Our comprehensive Pre Placement Program encompasses 8 meticulously designed modules, strategically curated to equip you with the essential skills and knowledge for job readiness and career success

No.	Course
1	Data Structure and Algorithm
2	Course Specific - Web Development   JAVA   Big Data   Data Science
3	Aptitude
4	Soft Skills
5	Profile Building

Course

# 01 Data Structure and Algorithms

In this module, we will dive deep into the fundamental concepts of Data Structures and Algorithms, which serve as the bedrock of computer science and software development. This module sets the stage for your journey towards becoming a proficient problem solver and lays a solid foundation for your future career.

## Curriculum:

1	Arrays	6	Linked List
2	2D Arrays	7	Stack
3	Strings	8	Heaps and Hashing
4	Recursion	9	Searching and Sorting
5	Binary search	10	Tree

## Learning Outcome:

By the end of this module, you will have a strong command of data structures and algorithms, setting the stage for your further exploration into advanced topics and specialization.

# 02 Web Development

In this module, we cover a comprehensive range of topics and skills that are essential for building dynamic and responsive websites. Here is an overview

## Curriculum:

1	Introduction of HTML(Hyper Text Markup Language)
2	Basics of CSS (Cascading Style Sheets)
3	Java Script
4	React
5	Node JS & Express

## Learning Outcome:

By the end of the course, you'll have a strong command of front-end technologies such as HTML, CSS, and JavaScript. You'll be able to create visually appealing and user-friendly websites that adapt seamlessly across different devices.

## Mini Project:

1	Build a project using dom manipulation
2	Build a Todo web app using react
3	Build backend for todo application

# 03 Data Science

In this module, you will explore a series of topics such as data manipulation, statistical analysis, machine learning, data visualization, and more. Each topic builds upon the previous one, ensuring a progressive and cohesive learning experience.

## Curriculum:

1	Impact of Data Science in today's world & Roles in Data Science
2	Python Interview Questions
3	Statistics Interview Questions
4	Machine Learning Interview Question and Solution Design
5	Deep Learning & Computer Vision Interview Questions
6	NLP Interview Questions & Project Deployment

## Learning Outcome:

By successfully completing our Data Science Course, you will unlock a world of possibilities! You'll master the art of data manipulation, statistical analysis, machine learning, and data visualization, equipping you with the skills to make impactful discoveries and shape the future through data.

# 04 Big Data

Our Big Data Course is designed to provide you with a comprehensive understanding of the fundamental concepts, tools, and techniques involved in working with big data. You will explore topics such as data storage, data processing frameworks, data analysis, machine learning with big data, and more.

## Curriculum:

1	Impact of Big Data in today's world & Roles in Big Data	7	Spark Interview Question
2	Python Interview Questions	8	NoSQL DB Interview Questions
3	SQL Interview Questions	9	Data Warehouse Interview Questions
4	Hadoop Interview Questions	10	Docker, Airflow, Sqoop Interview Questions
5	Hive Interview Questions	11	Project Related Interview Questions
6	Kafka Interview Questions		

## Learning Outcome:

In our Big Data Course, you'll gain confidence in attending the interviews in the field big data , as we prep you with the required interview questions on topics like, data analysis, machine learning, scalable data visualization, problem-solving, and teamwork, empowering you to unlock insights, drive informed decisions, and excel in the world of big data.

# 05 Java

Our Java Course covers a wide range of topics, starting from the fundamentals of Java programming and gradually progressing to more advanced concepts and techniques. You will learn about variables, data types, control structures, object-oriented programming principles, exception handling, input/output operations, multithreading, database connectivity, and more .

## Curriculum:

1	Java Language Fundamental	7	Collection API
2	Loops and Control Constructs	8	JDBC, Servlet, JSP
3	Class and Objects	9	hibernate
4	Interface and abstract class	10	SpringCore
5	Exception handling and MultiThreading	11	SpringMVC, SpringRest

## Learning Outcome:

Java is one of the most widely used programming languages in the industry. By mastering Java, you open doors to diverse career opportunities in software development, web development, mobile app development, and enterprise-level applications.

# 06 Aptitude

Our Aptitude Course covers two key areas: Quantitative Aptitude and Reasoning Ability. In the Quantitative Aptitude module, you will learn mathematical concepts, formulas, and techniques for solving numerical problems efficiently. The Reasoning Ability module focuses on developing logical and analytical thinking skills through various types of reasoning questions and puzzles.

## Curriculum:

Quantitative Aptitude	Reasoning
Number System	Blood Relation
Averages	Directions
Mixtures & Alligations	Coding & Decoding
Percentages	Binary Logic
Profit & Loss	Number Series
Ratio & Proportion	Classification
Simple & Compound Interest	Input & Output
Functions	Seating & Circular Arrangements
Equations & Inequations	Analytical Reasoning
Time, Speed & Distance	Cubes & Dices
Time & Work	Syllogisms
Geometry & Mensuration	Non-Verbal Reasoning
Permutations & Combinations	Data Sufficiency
Probability	
Progressions	
Set Theory & Venn Diagrams	
Coordinate Geometry	

# 07 Soft Skills

This module includes communication skills, teamwork and collaboration, leadership and management, problem-solving and decision-making, time management, adaptability, emotional intelligence, and more.

## Curriculum:

Icebreaker and Simple Greeting	Asking Simple Questions
